

# Steven Washington

Full-stack developer dedicated to creating clear, concise, and performant work that is a breeze to use and simple to maintain.

## EXPERIENCE

### Connelly Partners, Boston, MA — *Software Architect*

NOV 2013 - PRESENT

- Served as technical project lead for multiple marketing sites.
- Built and deployed web applications built with front end JS frameworks including React and Vue.js
- Managed web servers for deploying and hosting websites and webapps on nginx/Apache
- Introduced concepts of the JAMStack to the development team, and led a static site build with a focus on performance and accessibility.
- Brought to the team and implemented various developer operations tools
- Performed analyses of launched sites for Performance and Accessibility, providing reports on what went well, what could be improved, etc.
- Performed security analyses for websites, including implementing updates to codebases to align with security goals (https, API development best practices, etc.)
- Managed, as tech lead, local and remote teams in both back-end and front-end website development projects
- Developed interactive web applications for clients, which hooked into their own APIs as well as those for social media networks for a rich HTML5 experience
- Created other interactive experiences using Unity and Flash, including work with Google Cardboard VR

### Pod Digital Design, Lexington, MA — *Lead Developer*

MAY 2010 - NOV 2013

- Built interactive “adver-games” using various web technologies such as Flash and HTML5 canvas
- Developed mobile games for iOS and Android using Objective-C/Java as well as cross-platform solutions like Unity
- Worked with computer vision for Flash as part of a transmedia game

## EDUCATION

### Worcester Polytechnic Institute, Worcester, MA Interactive Media and Game Development (Technical)

2006 - 2010

46 Teel St, Apt 1  
Arlington, MA 02474  
(617) 710-9761
